ABOUT ME

As a Senior Executive of Web Development with 5+ years of experience, I specialize in architecting high-performance, full-stack solutions and leading complex project lifecycles. Proficient in modern ecosystems like Next.js, Node.js, and cloud infrastructures, I combine technical expertise with strategic leadership. From driving accessibility-first development to mentoring engineering teams, I am dedicated to delivering scalable, user-centric digital products that solve complex business challenges.

EXPERIENCE

Senior Executive - Web Development

2025 November - Current

Enfection (pvt) Ltd

- Architected and delivered full-stack web applications and scalable SaaS products utilizing Next.js and Node.js.
- Focused on innovation, leading team brainstorming sessions and utilized AI tools to accelerate development workflows.
- Engineered WordPress solutions, managing complex feature implementations and continuous website optimization.
- Managed cloud infrastructure and deployment pipelines on AWS, ensuring secure, high-availability application environments.
- Led technical consulting and client handling, translating complex business objectives into robust architectural blueprints.
- Mentored juniors, providing dedicated support for innovative problem-solving and establishing core coding standards.

Senior Web Developer

2023 November - 2025 October

eBeyonds (private) Limited

- Started as a web developer and, within a year, was promoted to senior by consistently delivering responsive web applications to local and global clients.
- Architected enterprise solutions, including complex hospitality platforms and corporate websites, using JavaScript and PHP.
- Optimized mission-critical applications through robust API integrations, advanced security upgrades, and performance enhancements.
- Managed end-to-end development pipelines, with custom CMS to deliver high-performance, accessible, and SEO optimized web architectures.
- Directed team technical excellence by establishing core coding practices and mentoring junior developers on modern UI/UX standards.

Freelance Web Developer

2020 March - 2023 October

Loopy Holdings (pvt) Ltd.

- Engineered high-performance dynamic websites and conversion-optimized landing pages.
- Directed end-to-end project lifecycles, from UI/UX design to technical SEO.
- Delivered scalable, bespoke digital solutions aligned with client business goals.

PROJECTS

Zayad University Student Portal

- Developed the frontend using Next.js and Tailwind CSS.
- Integrated Oracle RDS and a secure payment gateway.
- Managed client coordination for seamless end-to-end project delivery.
